

## 5kN Pneumatic Bollard Grips

**Material** – Aluminum Body, Steel jaws

**Max Tensile Rating:** 5kN or about 1,000 lbs. at 7 bar or about 100psi

**Recommended specimen diameter:** 3mm

**Temperature Range:** -10 to +80C – custom available

**Weight:** 1.25kg per grip.

**Coupling:** Female 5/8” clevis coupling with 5/16” pin hole

**Jaw Options:** Smooth, Serrated, Rubber or Diamond Coated – 15 x 44mm.

The 5kN Pneumatic Bollard Grip is designed for low force tensile testing of cords, wires and string. This grip design is chosen over our rope grips when a minimal amount of sample is to be used.
