

HYDRAULIC GRIP

Standard temperature range: 0...+70°C

Hydraulic sealings can be used from -30°C to +100°C

In special cases we can supply -10°C to +200°C

For negative values we recommend using nickel surface:

Clamping force:	60 kN at 315 bar 85 kN at 450 bar
Coupling:	Af318. Further couplings on request.
Single acting cylinder:	50 mm Ø, with spring return Max. stroke 15 mm
Hydraulic connection:	¼"
Body:	Steel, nickel-plated
Jaws:	Steel, nickel-plated, hardened
Weight:	Ca. 15 kg each grip without jaws
Scope of supply:	1 pair of grips without jaws
